Winchester, N. H., Feb. 15, 1914.

TO THE CITIZENS OF WINCHESTER:

As my term as chief of your fire department is about to expire, I feel it is my duty to make a brief

report concerning the condition of the fire department.

I would say as far as the members of the several branches of the department are concerned, never has there been in the history of Winchester the interest as at the present time, and I wish to thank the members of the department for their cooperation in making this a very successful year.

By the hearty support of the department we have been able to make some very extensive improvements. To a great extent this matter has been at the expense of the members of the several branches of the department.

At the present time we have a very large and efficient organization with a membership of one hundred and ten (110) men. That means a company for every piece of apparatus, ever ready to respond to your call.

As to the matter of apparatus at the present time, we have the steamer, two hand tubs, a chemical, hook and ladder, and an extinguisher truck with twenty-five (25) fire extinguishers.

We have added to the value of our apparatus \$2,000.00 during the past three years, and claim to have at this time one of the best equipped fire departments of any town in the state.

I would say we are in great need of an alarm system, as you know we have to depend upon the New England Box Factory or the Winchester Tannery for service, and are badly handicapped for this reason. We have to depend upon the watchmen of these factories, and if there should be a fire at night, they of course have to be at their posts of duty, which means perhaps a delay of twenty or thirty minutes, and that we cannot afford.

With our excellent telephone service, with a gong at the fire station, and being organized as we are, we would be prepared to give you excellent service, as there would be no delay on the part of the alarm.

What we would recommend is a system similar to that in Marlboro, N. H., which would be to have a man occupy the room at the fire station, which is quite fitted for occupancy, and to have a direct telephone connection to secure any call from rural districts. They would know instantly by the gong that they were to have our service at once.

The service of the man at the fire station would be no expense to the town, as we have a member who has volunteered his services. The matter of this system will be brought before the voters at the town meeting.

I feel that every citizen of Winchester should cooperate in this matter in order to get better insurance rates. Hoping this will meet your approval and secure your most thoughtful consideration,

W. H. HILDRETH,
Chief of Fire Department.

As probably most of our citizens know, the land known as the Musterfield was given to the town many

years ago for a training field. For some years the land was used as a dumping ground for rubbish and for obtaining gravel for use on the highways. Several years ago the town voted to discontinue to use it or allow it to be used for such purposes, and began to gradually redeem the plot from the unsightly condition it was in.

Last year the town voted \$100 for improvements. This money has been practically all expended as per above report. Your committee feel that a good showing was made last year, but more money is needed for further grading and other work, and recommend that the town make a further appropriation this year of one hundred dollars for improvement of the Musterfield.

Respectfully submitted,

JAME H. BLISS,	} Musterfield Committee.
MAURICE E. PARTRIDGE,	

REPORT OF Trustees of the Public Library.

The trustees of the Winchester Public Library present the following report for the year ending Feb. 15, 1914, it being the twenty-second annual report made to the town.

As was indicated in our report of last year, we have installed an entirely new heating apparatus in the basement of the library building at a total cost of \$147.88, which we believe is amply sufficient for warming the stack room, delivery room and reading room in our coldest weather and will serve for this purpose for some years to come. This has been paid for from the usual appropriations, as in fact have all additions and extensions to the library building in its past history.

We would call your attention to the conditions, at present existing, of the approaches to the main entrance of the library building, and would suggest that it will be found imperatively necessary, at no very distant day, that somewhat extensive repairs or restorations will have to be made at this point; also that the probable expense of proper repairs will be found to exceed the financial resources of your board of trustees and will require a special appropriation by the town for this purpose.

Whenever considerable expense has to be met by your trustees, of an extraordinary character, as the installing last year of an electric lighting system, and this year of a new heating plant, our ability to supply new books is limited by just the amount of the extra expenditures in these directions. Consequently only a few new books have been purchased during the year, yet the library has received considerable accessions to its reading matter by donations from Mrs. E. A. Allen, from the library of the late William F. Flint, and by many volumes from Mr. and Mrs. A. F. Peirce, all of which have been made accessible to the reading public.

Report of Superintendent of Schools.

To the Board of Education, Winchester, N. H.

The following report of the public schools of the town is hereby submitted for your consideration;

Our schools are in charge of a faithful, energetic, diligent body of teachers, their general condition is good, and the progress of the children is reasonably satisfactory. There is ample room for improvement, however, and it is our aim to make yearly some definite progress in school efficiency. We need a new school building, a more ample play-ground, the introduction of manual training, sewing, and cooking into the grades, more skilled attention to backward children, closer medical inspection, and the introduction of practical courses in our high school which will give better preparation for commercial and industrial pursuits, and for the management and care of the home.

Efforts have been directed this year to the improvement of the work in arithmetic. To that end a new series of arithmetics were introduced to replace the inadequate series so long in use. Considerable supplementary reading has been provided in several of the grades, and other grades will need to be supplied next year.

During the fall term several cases of scarlet fever developed in town. This led to the withdrawal of many children from school and to the closing of the

village schools for two weeks. The lower primary school has not yet recovered from this "scare." A membership of 50 on September 30 has been reduced for the winter term to less than 30.

We have in Winchester six mixed schools. The attendance in these schools is not large. It varies from six pupils in the smallest to eighteen in the largest, and each school varies in size each year. It is not easy to close these schools, even if it were desirable, because the matter of transportation is a difficult problem. As long as they are maintained, they are entitled to capable, resourceful and skilful teachers. Such qualities a teacher acquires through attendance at some training school, or by some means of successful experience in the school room. The untrained, inexperienced teacher, however conscientious she may be or however diligently she may labor for her school, rarely possesses those qualities. Our salaries of \$7.00 per week make it necessary oftentimes to engage such a teacher. Her failures should be considered as a necessary part of her apprenticeship. They should be sympathetically and leniently dealt with until such time as the teacher can find her bearings and through failure win success. Such is the way of life. Of course the welfare of the schools would be enhanced by paying a salary that will attract the more desirable teacher. I believe that an increase of one dollar in the teacher's weekly wage would be sufficient, and would prove to be an excellent investment.

The full number of pupils attending our schools not less than two weeks for the year ending July 15, 1913, was 415, which is one more than the total number for the previous year. The average daily attendance was 339.63, an increase of 1.91. The percentage

of attendance was 93.92, a decrease of .39 of one per cent.

Regularity and punctuality of attendance on the part of the pupils is to be sought for, not to make a good showing on the register, but because they are necessary in fixing good habits for life and for best advancement in the activities of school.

Chapter 93 of the Public Statutes was revised by the laws of 1913. As the law now stands any child over fourteen years of age who attended school the preceeding year no less than 300 half-days, and who has a health certificate from the school physician, is, on the approval of the superintendent of schools, entitled to a Labor Certificate. But the child must continue his school attendance until he has completed the grammar school course, or until he reaches the age of sixteen years.

Respectfully submitted.
